

Panaracer

2003 New XC Freeride & DH tire
for Full Suspension Bikes

FIRE FR

XC Freeride & Light Use DH for Full Sus.

New

26x2.40

**860g (ave)
Aramid Bead**

**1,020g (ave)
Steel Bead**

Panaracer introduces the newest member of the Fire family, the FR 2.4. Based on the same concept as the XC Pro, the FR 2.4 is made to work front and rear, and in all conditions. The Fire FR 2.4 performs as a XC Freeride tire, a light use DH tire, or anything else today's full suspension bikes can ride through.

Features:

1. The compound is the perfect combination of rubber and hardness to provide low rolling resistance and outstanding grip. All without sacrificing tread life.
2. 6 mm knobs dig in and grip everywhere.
3. Tread design has been adapted from the XC pro using both the Double Decker knob and Burning Edge design.
